EDUCATION

Florida State University

Tallahassee, FL

Bachelor of Science in Computer Science | Minor in Applied Mathematics

May 2027

Honors and Awards: Dean's List, Florida Bright Futures Academic Scholar | GPA: 3.52

Relevant Coursework: LLM Agent Systems, Data Structures & Algorithms, Databases, Applied Statistics, Discrete Mathematics

EXPERIENCE

Drafted Labs

February 2026 – Present

Founding Engineer

Remote

- Redesigned core platform architecture and internal workflows, improving system structure and scalability across the stack
- Engineer LLM evaluation and data annotation features in Python, writing unit-tested modules and validating quality across data pipelines serving 102,000+ vetted university contributors across USC, MIT, Stanford, UChicago, and more
- Built automated data pipeline workflows enabling real-time ML signal processing and quality scoring across contributor cohorts

Falcon Automatics

January 2025 – Present

Co-Founder

Remote

- Co-founded and architected a multi-tenant AI full scale automation platform with a decentralized microservices design spanning 6 MCP servers and 8+ autonomous agents for content generation, CRM, publishing, and outreach
- Designed RAG pipelines using Qdrant vector search and LLMs to power personalized campaign generation, brand voice consistency, and lead nurturing workflows at scale

Amazon Web Services

March 2026 – Present

Student Builder Campus Leader

Hybrid

- Drove cloud adoption across 500+ students through hands-on AWS labs, workshops, and infrastructure hackathons
- Automated provisioning of 10+ cloud lab environments in Python with unit-tested scripts, reducing average student environment setup time 35% across 500+ participants

Florida State University Department of Computer Science

January 2026 – Present

Undergraduate Systems Administrator

Tallahassee, FL

- Administered Linux and Windows Server environments across 300+ nodes, sustaining 99.5% network uptime at scale
- Diagnosed TCP/IP, DNS, BGP, and OSPF failures through packet-level log analysis and developed integration documentation for a 4-person ops team, reducing mean time to repair 30%

PROJECTS

SmartGallery | React, Python, AWS Lambda, S3, DynamoDB, Rekognition, Cognito, API Gateway

Serverless image recognition and management web app · AWS Cloud Club

- Coordinated 40 developers across 5 teams to deliver a serverless AWS application in 10 weeks with zero production failures
- Automated image processing pipelines via Lambda and Rekognition with full unit test coverage, eliminating 95% of manual tagging overhead and validating stability through end-to-end integration testing before each release

LEADERSHIP & PROFESSIONAL DEVELOPMENT

ColorStack

May 2026 – Present

Vice President of Administration

Tallahassee, FL

- Promoted from Communications Assistant (Jan 2026) after managing chapter Discord and member communications
- Rebuilt documentation and event workflows spanning 6 E-board functions, reducing operational planning overhead by 40%

Association for Computing Machinery

May 2026 – Present

Marketing Outreach Chair

Tallahassee, FL

- Spearhead outreach and marketing campaigns to drive student engagement and grow ACM chapter visibility across FSU
- Collaborate with E-board leadership to coordinate events, communications, and recruitment for 100+ member organization

AWS Student Builder Group

January 2026 – May 2026

DevOps Project Manager

Tallahassee, FL

- Built and maintained CI/CD pipelines using Git across a 40-person engineering team, improving deployment speed 50%
- Translated cross-functional project requirements into technical documentation and integration plans for 5+ initiatives

ADDITIONAL INFORMATION

- **Languages:** C++, C#, Python, Java, SQL
- **Cloud & Infra:** AWS, Docker, CI/CD, Git, Linux, Windows Server, DevOps
- **Systems & Embedded:** Linux Kernel, TCP/IP, DNS, BGP, OSPF, ASIC SDK, Emulator/Simulator Environments
